

PRESS RELEASE

BKL unveils three never-before-seen machines at Bauma 2022.

To mark its 15th Bauma anniversary, BKL is presenting three cranes and a film highlight to industry visitors at its new stand in the Outdoor Exhibition Area south FS.1203/1.

Munich, 23 September 2022 – A crane premiere, stellar service and a sensational live show: at Bauma 2022, the crane specialist BKL Baukran Logistik is celebrating its 15th show with several attractions at its new stand FS.1203/1. They include three tower cranes that are being shown for the first time at Bauma plus a film highlight that demonstrates the company's outstanding expertise with spectacular footage of lifts using mobile cranes.

"To mark our trade fair anniversary, we are showcasing innovative crane technology and operations that make BKL a specialised partner for all kinds of lifting projects as one of Europe's largest full-service providers of crane solutions. We are remaining true to ourselves and setting the bar at Bauma even higher for the 15th time", says Alexander Volz, owner and Chairman of the Advisory Board of BKL.

Major highlights at BKL from a historical crane to the state of the art.

As a Bauma exclusive, BKL will be presenting Luigi Cattaneo S.p.A.'s brand new self-erecting crane. The most recent type of crane produced by the BKL's longstanding Italian partner and co-exhibitor is rounding off the BKL System Cattaneo in the stationary crane segment, it features optimal specifications for building small residential complexes and Industry 4.0-compatible technology.

By contrast, in light of BKL's Bauma anniversary, the crane specialists and Cattaneo have a treat in store for all crane fans in Munich. Visitors to stand FS.1203/1 can take a closer look at a historical miniature crane dating from 1959 with a hook height of approximately 7 to 13 metres, enabling them to trace the development of crane technology from the first hand-operated crane right through to modern, Industry 4.0-ready machines.

Also making its first appearance at BKL is the third crane that BKL will be showcasing in Munich from 24 October onwards. The top-slewing crane can operate even when space is at a premium. Thus, not only does it add a new product group to the selection of over 500 tower cranes in BKL's rental fleet, it also offers an entirely new range of particularly efficient crane solutions.

Mammoth tasks: BKL cranes in action on the video wall.

The video wall is the centrepiece of the stand, allowing visitors to see BKL's over 600 mobile and tower cranes being deployed in the field. Project documentation and footage of mobile cranes, tower cranes, mobile construction cranes and transportation present tailored crane solutions, precise logistics and excellent service.

The highlight, BKL's brand new film, is sure to attract attention at Bauma where it will be shown on a twelve square-metre LED wall. The cinema-quality video guarantees chills and follows an unusual story line in which the crane operators are the true heroes. Exclusively at the BKL stand, customers can find out how the film was made and enjoy the complimentary refreshments at one of the requisites. Both the trailer and the film itself will be available on www.bkl.de/bauma in the near future.

PRESS RELEASE

Photographs:

BKL unveiled a product innovation at Bauma 2019.

BKL and Cattaneo introduced the brand new CM 415 at Bauma 2019. With a maximum hook height of 31.5 metres and up to 5 tonnes load capacity, the largest crane in the BKL System Cattaneo has proved to be a powerhouse in BKL's rental fleet and at numerous construction sites. There will be more exciting news to come in 2022.
