## **BKL presents its new business segment.**

**As an additional service, the crane specialist now handles industrial assembly projects all over Germany.**

**Munich, 30 October 2023 – As of today, BKL Baukran Logistik GmbH offers industrial assembly as well as lifts and transport. The Munich-based full-service provider of crane solutions is extending its service portfolio with its new business segment, thereby continuing to drive its successful growth course. During the implementation phase, BKL's team of experienced machine and plant engineers demonstrated their expertise in various projects.**

"Our strength lies in moving loads and positioning them accurately. Not just transporting and installing industrial machinery and industrial plants, but also assembling them at their destination is the logical consequence in taking our services to the next level. As a step in our expansion plan, BKL's one-stop service now gives our industry customers even greater peace of mind", says Jörg Hegestweiler, CEO at BKL.

### **Industrial assembly as a new service.**

As one of Europe's leading providers of crane solutions with over 600 construction and mobile cranes plus a huge fleet of loader cranes, trucks and low-loaders, BKL reliably handles transport and lifts throughout Germany – to the highest standards. The family-owned business is now extending its certified DIN EN ISO 9001 and SSC<sup>P</sup> portfolio for the industry sector. Experienced machine and plant engineers will team up with truck drivers and mobile crane operators not just to transport and lift industrial plants and sections, but also to assemble them directly onsite. BKL's specialists have a wide range of state-of-the-art equipment at their disposal.

Available throughout Germany, the service includes planning, disassembly and move-out, relocation and move-in, re-assembly and assembly. Maintenance and repairs round off the portfolio.

### **Maximum precision for almost all industry sectors.**

Since the implementation phase, launched in May 2023, BKL has successfully carried out numerous projects for different customers, from the beverage industry, the pharmaceutical and chemical industry, through to precision engineering.

For example, the Wolters brewery in Braunschweig commissioned BKL's North/East team to install a flash pasteuriser, from the lift to assembly. After preparing an LTM 1070-4.2 mobile crane with 10.7 tonnes of ballast, they inserted the plant sections through an opening by means of an 8-metre platform. Once the lift was completed successfully, the experienced professionals assembled the various plant sections – weighing between 100 kilograms and 6 tonnes – with maximum precision in the production facility.

Moreover, while positioning and assembling a machining centre for a precision metalworking customer in North Germany, the BKL team demonstrated their consummate skill, placing the 12-tonne machining centre in the manufacturing hall, despite the limited available space. The centre was aligned to the millimetre using machinery skates and fork lifts.

## **A night-time lift.**

A 70-tonne mobile crane from BKL's fleet lifts the new flash pasteuriser into place at Wolters brewery. Once positioned correctly, the machine is adjusted and assembled with pinpoint precision.

## **Precise alignment.**

With consummate skill, BKL's industrial fitters adjust the components of a machining centre.

## **Bespoke turnkey packages for transport and lift.**

BKL transports machines and parts for industry customers, supported by its fleet of over 100 mobile cranes plus various trucks and low-loaders. As of this year, the company now also handles industrial assembly with its experienced team.

*Indications of weight in tonnes refer to metric tons.*

## **About BKL.**

BKL Baukran Logistik GmbH specialises in crane rental, sales and service. With over 50 years of experience and more than 300 employees in Munich, Ingolstadt, Rosenheim, Frankfurt, Aschaffenburg, Hannover and Hildesheim, the company is one of Europe's largest manufacturer-independent, full-service providers of crane solutions. BKL's crane fleet offers over 500 tower cranes, with a radius from 22 to 90 metres, plus over 100 all terrain mobile cranes from 30 up to 700 tonne giants and 20 mobile construction cranes with a radius of up to 65 metres. Moreover, BKL customers benefit from the bespoke turnkey package, certified according to DIN EN ISO 9001 and SCC<sup>P</sup>, including planning, logistics and transportation, as well as the 24-hour emergency service. BKL's reference projects include the Allianz Arena, BMW Welt, the European Central Bank and Terminal 3 at Frankfurt Airport.
