

More height. More reach. Hydraulic performance: BKL launches a 43-metre crane.

The new BKL System Cattaneo CM 430, with a radius of 43 metres and a hook height of 32.5 metres, will be exhibited for the first time at Nordbau.

Munich, 13.08.2026 – BKL Baukran Logistik GmbH is launching the brand new CM 430 self-erecting crane in Germany. Not only does the 61-tonne-metre crane expand the BKL System Cattaneo horizontally and vertically, it is also one of the hydraulic cranes with the greatest reach. The new machine will be unveiled at the Nordbau 2026 trade fair in Neumünster, Germany.

BKL presents a new hydraulic crane in the 61-tonne-metre class.

With a maximum lifting capacity of 4 tonnes, the CM 430 is designed for construction sites requiring high material handling capacity, as well as for demanding residential and commercial projects. The new self-erecting crane in the BKL System Cattaneo offers a maximum radius of 43 metres, making it one of the hydraulic cranes with the widest reach on the European market. With two hook heights of 26.5 and 32.5 metres, and no need for additional tower sections, it can compete with lattice boom cranes in the 61-tonne-metre class, yet is easier to assemble and quicker to deploy thanks to its folding system.

Flexible deployment and compact site logistics.

On site, the CM 430 can be used even in confined spaces thanks to its slewing radius of just 2.5 metres. The 2-fall technology ensures efficient operation through a high handling rate. In addition to the MicroMove fine-lift function, the further-optimised slewing characteristics support the precise positioning of loads. Furthermore, the crane comes with height-adjustable spindles for easier assembly as well as the 'Industry 4.0 package', which prepares it for the digitalisation of the construction site. The new self-erecting crane is also flexible in terms of transport, as it can be moved via a fifth wheel coupling or a drawbar.

Full lifting capacity with excellent cost-performance ratio.

The CM 430 is now available to hire or purchase from BKL. As with all new cranes in the BKL System Cattaneo, BKL is offering the new self-erecting crane in Germany at an 'all-inclusive' purchase price which includes the three-year BKL quality guarantee, support pyramids, a radio remote control as well as delivery and initial assembly within Germany. Customers also benefit from BKL's comprehensive crane service.

Premiere at Nordbau 2026.

BKL will present the CM 430 for the first time in Germany at Nordbau 2026. From 9 to 13 September, visitors are invited to find out more about the technology, transport options as well as rental and purchase opportunities at Stand N516, Flensburger Straße, in the outdoor exhibition area North in Neumünster. The BKL North/East team will be on hand to advise on its comprehensive range of services, which extend from assembly and relocation to repairs and a 24-hour emergency service for tower cranes. In addition to over 500 top-slewing and bottom-slewing cranes, customers can also choose from a wide selection of mobile cranes and mobile construction cranes, as well as transport services.

Nordbau 2026:

9 to 13 September at Holstenhallen Neumünster

BKL Baukran Logistik GmbH:

Outdoor exhibition area North, Stand N516, Flensburger Straße

BKL exhibit CM 430:

- Max. radius: 43 metres
- Max. lifting capacity: 4 tonnes
- Peak load: 1 tonne
- Hook height: 26.5 and 32.5 metres
- Performance class: 61 tonne-metres
- Slewing radius: 2.5 metres
- Key features: two hook heights without additional tower sections, MicroMove, hydraulic assembly, height-adjustable spindles
- Technical information: [Data sheet](#)

**Image 1: Hydraulic and with a long reach.**

The new CM 430 expands the range of self-erecting cranes in the BKL System Cattaneo and, with a radius of 43 metres and a hook height of 32.5 metres, can compete with lattice boom cranes in the 61-tonne-metre class.

Indications of weight in tonnes refer to metric tons.

About BKL System Cattaneo.

BKL System Cattaneo includes eight self-erecting cranes that are continuously upgraded by BKL and the Italian crane manufacturer Luigi Cattaneo S.p.A. to ensure they meet customers' requirements. The crane specialist has been renting the machines since 1994 and now distributes them exclusively in Germany and Austria under the BKL System Cattaneo brand. The cranes offer jib lengths of 22 to 43 metres and maximum hook heights of 17.3 to 32.5 metres. Moreover, 80 km/h and 25 km/h axle systems are available for the self-erecting cranes. About BKL Baukran Logistik GmbH.

BKL Baukran Logistik GmbH specialises in crane rental, sales and service. With over 55 years of experience, 1,000 machine units and more than 400 employees in Munich, Ingolstadt, Rosenheim, Frankfurt, Aschaffenburg, Nuremberg, Ansbach, Hannover and Hildesheim, the company is one of Europe's largest manufacturer-independent, full-service providers of crane solutions. BKL's crane fleet alone offers over 500 tower cranes, with a radius from 22 to 90 metres, plus over 140 all terrain mobile cranes from 30 up to 700 tonne giants and 30 mobile construction cranes with a radius of up to 65 metres. Moreover, BKL customers benefit from the bespoke turnkey package, certified according to DIN EN ISO 9001, DIN EN ISO 50001 and SCCP, including planning, logistics and transportation, container and industrial assembly, as well as the 24-hour emergency service. BKL's reference projects include the Allianz Arena, BMW Welt, the European Central Bank and Terminal 3 at Frankfurt Airport. For further information, please see <https://www.bkl.de/en/>.
