

COMANSA and BKL to repeat in Bauma.

Munich, 6 February 2019 – Tower crane manufacturer and German crane specialist will share booth FS 1103/1 for the third time at the 2019 edition of the world's largest construction trade show.

Following the successful experiences of 2013 and 2016, tower crane manufacturer COMANSA and its German dealer BKL Baukran Logistik will join forces again for the upcoming Bauma show, to be held in Munich in April.

BKL and COMANSA will be found at FS.1103/1 at the outdoor area of Messe Muenchen, with a space of almost 800 square metres. The booth is at the same location than in 2016, when they exhibited a spectacular 80-metre high 21LC750 which was the tallest tower crane in Bauma.

The relationship between both companies started in 2011, when BKL purchased a package of six COMANSA flat-top cranes with a maximum load capacity from 8 to 18 tonnes. Soon afterwards, BKL became COMANSA' dealer in Germany and started selling and renting the cranes.

BKL is one of Europe's most important crane companies, owning a large fleet of more than 100 mobile cranes and about 500 tower cranes, being more than 30 from COMANSA's medium and large range up to 50 tonnes load capacity and 90 metre reach. Headquartered in Munich, BKL is offering rental, sales and service by further branch offices all over Germany.
